

PART L COMPLIANT?

PART L COMPLIANT LABELS FROM **£39 PER 1,000**

Building Regulation Part L (Part L1B:2010 Edition) changes on 1st October 2010. If you are selling an unglazed, 5 chambered, 70mm, PVCu system then why not fit one of our Part L labels? It clearly tells your customer what glass to use in order to be compliant. Designed to fit within the 18mm friction stay location detail on your frame, transom or mullion, the label is a visual indication that will leave your customer in no doubt as to what is required in order to satisfy building regulations. The information is taken from the FENSA bulletin and will be appreciated by building inspectors, installers and homeowners. It is your duty of care to take adequate steps to ensure your frame is compliant.

Here is your answer...
