

Unibay

WW Unibay for 70mm frames
120°-170° & 90°-120°

Fits 90% of 70mm systems!
Reduce your stock...

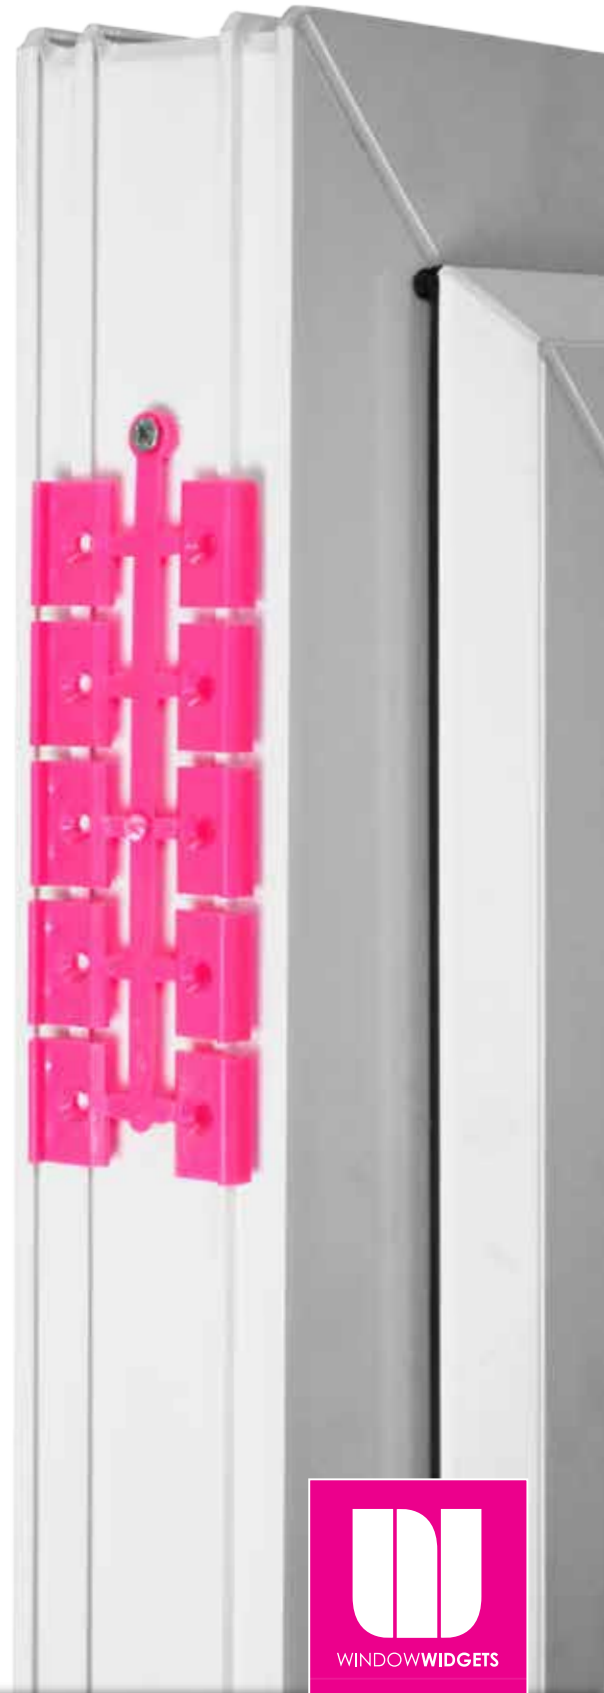

120° - 170° Shown

Simply screw block of moulding to frame and installer fixes at max 250mm centres to frames joining Baypoles.

Remember – Our design has evolved with consideration to the results from extensive loadbearing testing at BBA and our fully enclosed circular extrusion gives important extra strength when you interface with a loadbearing Baypole Jack. It is at this point where failure can occur, where the pole spreads over the Jack under load. Our Stainless Steel Baypole Jacks are BBA accredited.

Loadbearing calculations are available along with frame deductions (including reverse angles). In the range we also have clever solutions for bow-bays, cornerposts & in-line couplers.

Unibay

WW Unibay for 70mm frames

120°-170° & 90°-120°

Window Widgets introduced its popular Easy Bay system in 2007. The Easy Bay design has been used for several years by some of the biggest fabricators in the UK without problems.

Unibay has been developed to allow fabricators of more than one 70mm window system to **standardise on one Baypole**.

ORDER GUIDE

Part No	Spec	Pack Size	Baypole Jack	Ixx (cm ⁴)	Iyy (cm ⁴)
