WINDOWWIDGETS **zero** is a range of cost effective, decorative Baypoles with one common theme - **zero** frame deduction. The system fits 70mm frames and the zero deduction makes the range ideal for trade counters and installers who use more than one system. the 90° Cornerpost has a choice of 3 reinforcements so you can engineer price and specification for the job in hand. The 135° butts to a point and no internal trim is required, thus saving cost and making woodgrain on white installations a breeze! The same jack fits both angles thus making the range as simple and neat as possible.
