FOR FRAME DEDUCTIONS SEE P88-89

WWL122 fits Rehau S706 and Thyssen Only.

WWL 122

WWL122 is an alternative to our popular variable angle bay system (482054). With this solution we have done away with the frame adapters thus making installation easier in some situations. The Angle range is 125° - 170°. The product is load bearing and a Baypole Jack is available. WWL122 fits Rehau S706 and Thyssen 70mm. **For Bay Jack order Jack D WWL122**
