

BRIDGEPACKERS

BRIDGEPACKERS

Bridge packers are profile related and designed to give the installer a flat surface to pack away from, thus speeding up glazing time.

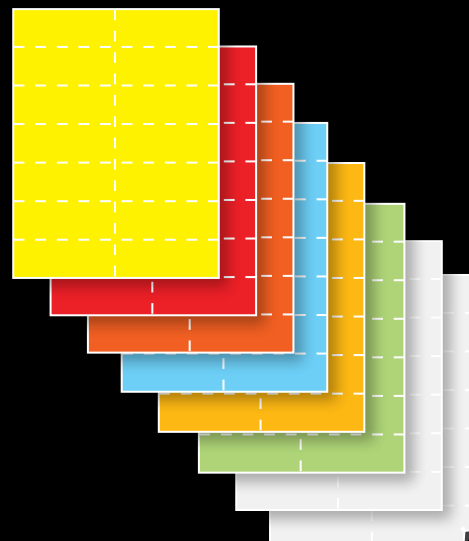

All have a positive 'Clip Fit' and will stay in position during transport. Our packers allow for drainage (some competitor products seem to channel water towards the bead) and we have designed a generous wall thickness to support larger units (e.g. glazed doors).

Part No.	Description	System	Box Qty
BPEL	Bridge Packer	Eurocell Eurologic	1000
P22BP02	Bridge Packer	Profile 22 70mm	1000
SYNBP01	Bridge Packer	Synseal Synerjy + Shield	1000
BPVEKA70	Bridge Packer	Veka 70mm	1000
WWKBP01	Bridge Packer	Kommerling 70mm	1000
WWR70BP01	Bridge Packer	Rehau 70mm (Available July 08)	1000
WWDBP01	Bridge Packer	Deceuninck / Status 70mm	1000

LASERLABELS

We supply 7 different colours of laser labels - to allow you to colour code production. Colour code by production day, by customer, by delivery or by batch! The labels are supplied in boxes of 100 sheets, with 14 labels per sheet.

LABEL COLOUR	PACK SIZE
Laser Radiant Yellow	1 box (100 sheets of 14)
Laser Red	1 box (100 sheets of 14)
Laser Orange	1 box (100 sheets of 14)
Laser Blue	1 box (100 sheets of 14)
Laser Mustard	1 box (100 sheets of 14)
Laser Green	1 box (100 sheets of 14)
Laser White	1 box (100 sheets of 14)
Laser White (Easypeel)	1 box (100 sheets of 14)

LABELS

LABEL TYPES

PRODUCTION LABELS

Setting up simple systems in production makes sense. Consider using some of our standard production related labels to take the stress out of day to day problems. These labels are printed on 'radiant' coloured labels with bold black text. The labels are 62mm wide x 32mm high and sold in reels of 1000.

FRAGILE LABELS

Nothing too special about this one other than it measures 105mm x 35mm with the word 'FRAGILE' printed in white on a red background. Ideal for glass, polycarbonate, door panels or anything sent in the post.

PART L LABELS

Part L had a massive impact on the Glazing industry. To reduce confusion, we produced an easy to understand and comprehensive data label, designed to fit into the friction stay location detail on frames and transoms/mullions (18mm wide). It is ideal if you are selling un-glazed trade frames since it tells the customer what glass specification is required. For finished windows, it gives consumer information and confidence - and it looks great in a metallic waterproof finish.

CLEANING & MAINTENANCE INSTRUCTIONS LABELS

18x130mm, finished in a water proof silver metallic, this label fits into the friction stay location detail on frames and transoms/mullions. It contains the "Do's and Don'ts" for cleaning PVCu white and foiled windows - failure to adhere invalidates the warranty!

CUSTOM LABELS

Create your own label design! You may need to print your BSI/ BBA Kitemark numbers or you may want to simply order a variant of our standard labels with your name/logo? Whatever you want, just sketch it out and fax it through with an indication of label size, volumes and colours. We will send a quote back the same day and we can produce within 7 days from approval of artwork - which we will create for free! Costs are less than you think! Minimum order 5000.

LABEL	REEL SIZE	COLOUR
QC APPROVED	1000	GREEN
QUARANTINED (do not touch unless authorised)	1000	RED
URGENT (this frame to be given priority)	1000	ORANGE
SCRAP	1000	BLUE
TRADE	1000	RED
RETAIL	1000	ORANGE
FRAGILE	1000	RED

Cleaning + Maintenance	1000

Cleaning and Maintenance Instructions for White and Woodgrain PVC-U Windows

- *Do not use solvent based cleaners (e.g. cellulose thinners or acetone)
 - *Do not use abrasive agents
 - *Do not attempt to clean dry surfaces with dry cloths
 - Use well diluted domestic washing up liquid
 - Use domestic soap
 - Use lukewarm water
 - Use specialist PVC-U cleaner
- Note - Moving parts and mechanisms (locks, hinges and handles) must be lubricated at least twice annually

IMPORTANT
Breach of these instructions may invalidate your warranty or guarantee

HEADDRIP&DRIPCILL

2 PROBLEMS
1 SOLUTION

DRIPCILL

HEADDRIP

- Screw fix, fits any system, 60mm or 70mm
- Works as head drip for exposed elevations
- Especially useful for tilt and turn, patio door as well as casement products
- Use as a drip cill for stone cill situations
- Universal product with sensible pack sizes ideal for fabricators and stockists
- Designed with enough room to silicone at the head (room for your nozzle).

PART NO.	DESCRIPTION	COLOUR	PACK SIZE
HD (Specify White)	Head Drip / Drip Cill	White	20 x 3m
HD (G)	Head Drip / Drip Cill	Golden Oak	5 x 3m
HD (M)	Head Drip / Drip Cill	Mahogany	5 x 3m
HD (R)	Head Drip / Drip Cill	Rosewood	5 x 3m
