

PROTECTION

FRAMEPROTECTION

HANDLEMESH

HANDLE MESH

Protect your window and door handles from damage with our 'handle mesh'. This product stretches and expands to several times its original size and it takes shape of whatever it is stretched over. Depending on your handle design the mesh will grip the handle tightly as it tries to revert to its original shape and will stay in place. For some handle designs it will be necessary to open the handle, slide on the mesh and when you close the handle the mesh will be held in place.

We supply it cut to length in boxes of 1000 pieces. At 150mm long, it is ideal for window handles and at 200mm it is ideal for your door handles.

HANDLETOREBATEADAPTER

HANDLE TO REBATE ADAPTER

This adapter allows your handles to be attached to the rebate of the frame. By doing this you can keep the handle and frame together and protect the handle whilst making it possible to stack more frames in you van (they take up less space). The adapter is 17mm high - can be stacked for longer spindles. Supplied in boxes of 1000.

HINGEPROTECTOR

RE-USE & RECYCLE

HINGE PROTECTOR

Fits all known butt and flag hinges - screw fix to any 70mm frame. Use in 1.8m lengths or cut to the size of your hinge. Manufactured from recycled PCVU this product can be re-used and recycled. Door hinges can be difficult to replace once the door is fitted and sending out replacement hinges is a bore!

SCREWFIX

PRICING AND CAPACITY

We have capacity to manufacture over 50,000 corner protectors per day in 60mm and 70mm variants. This allows our products to be competitively priced despite the products containing c.30% more material (more protection) than our competitors products.

For a cheaper solution, try one of our 70mm bouncy corner protectors!

60mm AND 70mm SCREW FIX CORNER PROTECTORS

Low cost, universal fit screw-on design which will offer affordable protection to any frame. Quicker to fit than clip-fit designs.

70mm CLIP FIT CORNERS

Limited range available (See table below)

70mm BOUNCY CORNER PROTECTORS

Manufactured from a soft material, we have been able to reduce material content without compromising protection. The bouncy material absorbs impact without cracking your weld.

LOW COST CORNER PROTECTOR

BOUNCY
