PILASTER

wide enough to  
hide downpipes!

# PERIOD DETAILING FOR CONSERVATORIES

**Pilaster** is a system of 70mm frame couplers designed to enhance the appearance of PVCu conservatories. Designed with "chunky" oversize features to give a perceived added value to the homeowner. Technically excellent, the range is load bearing, has a jacking system and is available in various whites and foils. The Pilaster range incorporates the patented anti-racking bracket - so popular on our mighty mullion range.
