

WINDOWWIDGETS has allocated part numbers and colour codes for its PVCu products. The full ordering code must comprise of the part number and colour code.

Here is a list of the colour codes used to designate different whites...

When choosing whites, it is often quite subjective and we have compiled this list based on experience of what customers have ordered. If in any doubt, please call and we will send you a sample pack of all of the different white options for you to choose.

If your system is not listed, don't worry, just call and we can help you choose the correct match. If in any doubt, please request a colour sample pack.
